# What do you get?

## Assessed and identified

Maturity of the  
organization's AI  
capability

The importance of  
AI for business in  
the current and  
target state

1-2 Business-  
Changing AI  
Use Cases

Concrete next  
steps

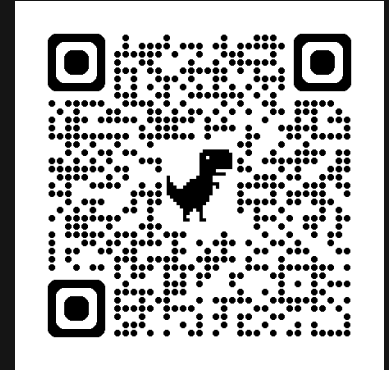

*"At least from my side, I can say: it was definitely worth it! 🦊 💪 💡"*

*We succeeded in clarifying the overall picture and building a shared understanding of the role of AI. The prioritization of the idea proposals collected as a homework assignment sparked lively discussion—even heated debate. There's already a lot going on within the Telinekataja team when it comes to leveraging AI, and useful data is available, too. However, selecting the right focus and roadmap truly requires a shared language and clearly defined ambition across the leadership team. And that is exactly where AI Finland's training excels."*

Anna Tapio, Member of the Board at Telinekataja and professional board member
